Med Vantage

Global Medical Tourism Platform — Official Production Launch Dossier

• PRODUCTION ACTIVE

Live URL: https://medvantage-kappa.vercel.app

Target: Cross-Border Healthcare & Facilitation

Release Date: November 2026

1. Executive Summary & Platform Overview

Med Vantage connects international patients with accredited cross-border healthcare providers (Apollo, Fortis, Bumrungrad, Acıbadem, Gleneagles, Cleveland Clinic Abu Dhabi, Médica Sur, Quirónsalud). The platform provides end-to-end pricing transparency, multi-tier accreditation verification (JCI & NABH), remote super-specialist second opinions, and full travel coordination (hotel, visa, insurance, VIP transfers, and medical translators).

2. Production Deployments & Build Artifacts

Asset Component	Environment / Target	Endpoint / Path	Operational Status
Web Application	Vercel Global Edge Network	`https://medvantage-kappa.vercel.app`	✓ Live & Operational (200 OK)
Git Source Repository	GitHub (Continuous Deployment)	`universaldigilabs/openmed-portal`	✓ Main branch synced
Cloud Database	Supabase PostgreSQL 15	`https://uutvrjladpfnuqauwjwk.supabase.co`	✓ Migrated & Active
Android Mobile App	Capacitor Native Android (Debug)	`android/app/build/outputs/apk/debug/app-debug.apk`	✓ 3.82 MB APK Ready
Android Release APK	Capacitor Native Android (Release)	`android/app/build/outputs/apk/release/app-release.apk`	✓ Compiled

3. Core Functional Pillars

🏥 Hospital & Clinic Verification

Verified accreditations (JCI & NABH). Complete multi-filter directory by country, specialty, and technology across 8 flagship international hospitals.

📊 Cost Transparency & Savings

Interactive benchmark engine comparing US, UK, India, Thailand, Turkey, Mexico, and Spain. Visual indicators highlight 60%–85% cost savings in India.

🩺 Remote Second Opinions

48-hour tele-triage with world-renowned surgical specialists. 100% of remote consultation fee credited

✈️ Travel, Visa, & Insurance Hub

End-to-end concierge covering medical visas (e-Visa), sanitized recovery hotels/serviced apartments, cashless

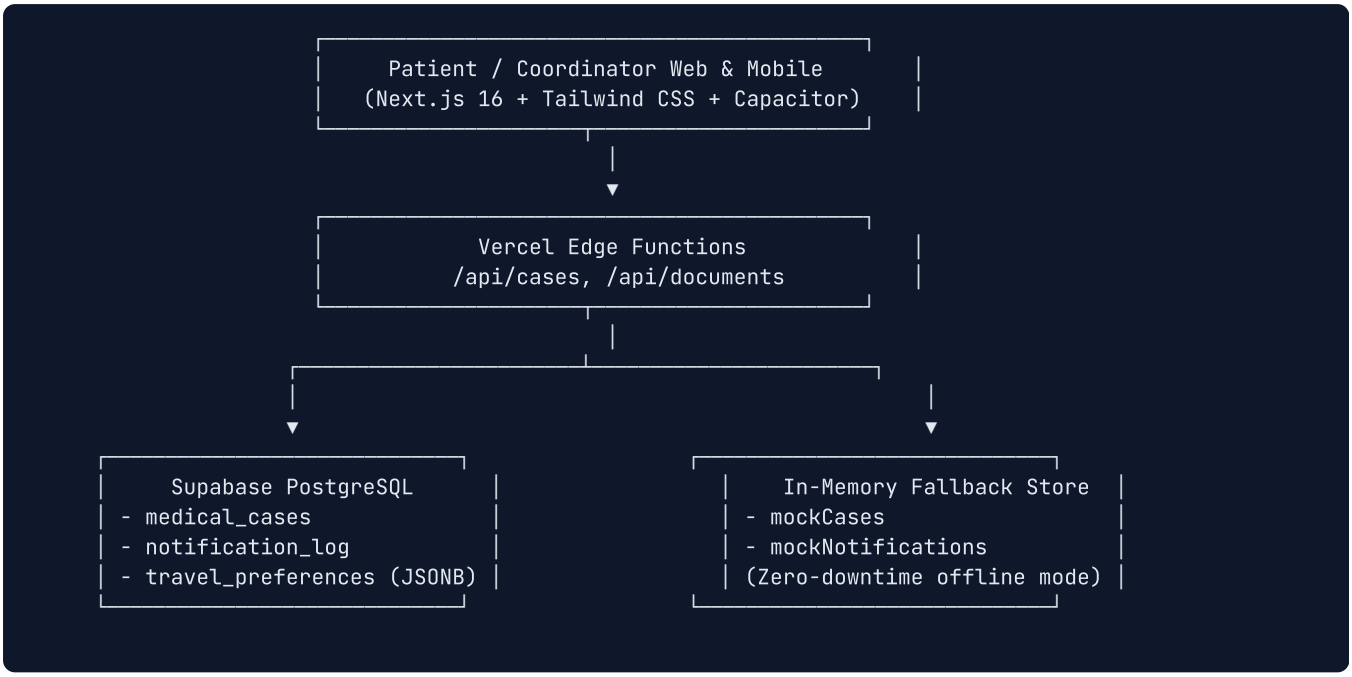

back upon hospital admission.

insurance TPA, and native interpreters.

4. Patient Concierge & Triage Workflows

- **Patient Intake Form (`/intake`):** Multi-step interactive medical inquiry workflow capturing medical diagnostics, preferred hospital/country, plus explicit selections for **Hotel Booking Assistance** (Serviced Apartment, 4/5-Star Hotel, Recovery Suite), **Medical Visa Attendant Count**, and **Health Insurance Pre-Authorization**.
- **Coordinator Triage Console (`/coordinator`):** Live operations dashboard for care managers featuring instant assistance filtering (`Hotel`, `Visa`, `Insurance`), patient audit log, and one-click quote generation.

5. End-to-End System Architecture

6. Live Production Smoke Test Results

Tested Endpoint	Route	Result	Notes
Landing Page	`/`	200 OK	Procedure & destination search active
Hospitals Directory	`/hospitals`	200 OK	JCI & NABH filters working
Cost Comparison Calculator	`/cost-comparison`	200 OK	9 procedure benchmarks responsive
Second Opinions	`/second-opinion`	200 OK	Tele-triage intake loaded
Travel & Concierge Hub	`/travel-services`	200 OK	5 tabs (Visa, Hotel, Insurance, VIP, Language)

Cases REST API	`/api/cases`	200 OK	Supabase JSON response validated
Filter: Hotel Assistance	`/api/cases?assistance=hotel`	200 OK	Live filter active

Tested Endpoint	Route	Result	Notes
Filter: Visa Assistance	`/api/cases?assistance=visa`	200 OK	Live filter active
Filter: Insurance Assistance	`/api/cases?assistance=insurance`	200 OK	Live filter active

7. Zero-Cost Maintenance & Handover Guidelines

- **Hosting:** Vercel Hobby Tier (free, high-availability edge network, automated SSL certificates).
- **Database:** Supabase Free Tier (PostgreSQL 15, Row-Level Security, 50,000 monthly active users).
- **Mobile App:** Standalone native Android APK (Capacitor) synced to live web runtime without app store rebuild requirements for frontend updates.
- **Zero-Downtime Guarantee:** Dual-layer fallback architecture automatically routes to local store if external DB is ever unreachable.
